**Summary:** As a web developer with 9+ years of experience in PHP and related open-source technologies, I have led web developer's teams for over 3 years, delivering projects from end to end. I am skilled in all phases of the software development life cycle, from requirements gathering to production support. My object-oriented design and development skills with a focus on web development are excellent, enabling me to create scalable, modular, and maintainable code. I am a proactive problem-solver who is committed to delivering quality work on time and within budget, making me a valuable asset to any organization.

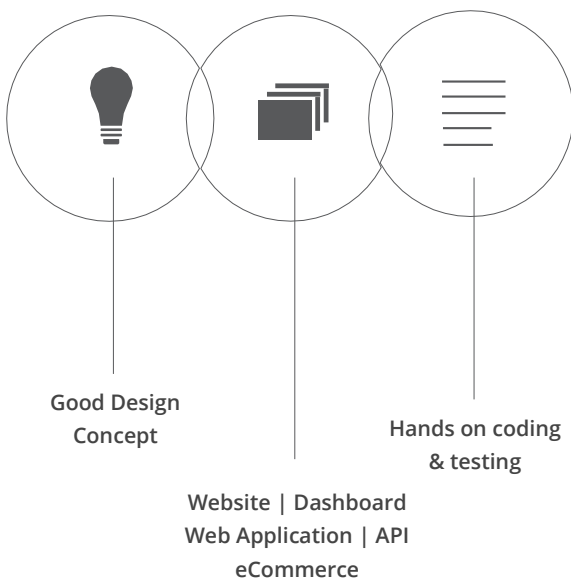

**Personal Statement:** Experienced PHP full-stack engineer with a passion for website design and development. Based in Delhi, I have been committed to continuously improving my skills in all aspects of web development over the past nine years.

**Vocation Objective:** I am seeking a position that will allow me to further develop my skills and gain valuable work experience. My goal is to leverage my abilities to contribute to the growth and development of both myself and the organization.

## Current Role & Responsibility:

- Client interaction(Domestic & International) and requirements gathering
- Create SRS documents and define the tech stack according to the project
- Discussion with stockholders and team (some time also build the team), to finalize the time amount
- Involvement in define the DB structure and front-end design
- Create work flow, assign the task and team management also used JIRA for some projects
- Manage version control & deployment on apache web server
- Create test case documents

**\*\***

I have developed so many backend and web applications, some with a team and some individuals that are credentialed-based and can't provide links.

Some projects have Mobile Apps, so I worked & managed both web and mobile developers, as well involved in defining structure and workflow, and developed the REST APIs for that as well.

I did payment integration and many third-party APIs integration.

I did report work, some developed in the backend and some with Power BI.

Also did work with different techs like voice operating devices or voice commands on the web page.
